Early Varieties.

Dreer's Eureka Extra Early. (See cut.) One of the earliest and most prolific extra early varieties, which has given the best results wherever grown. Dreer's Extra Early Electric. A variety of the green-seeded Alaska type, but a great improvement, being much earlier than the Alaska and bearing larger pods. Qt., 30 cts.; 4 qts., \$1.00; peck, \$1.50; bu., \$6.00.

Alaska. An extra early round pea, bearing pods of a dark green color, which are well filled and ripen uniformly; height 2 feet. Qt., 25 cts.; 4 qts., 85 cts.; peck, \$1.45; bu., \$5.80.

Surprise Pea. The vines grow about two feet high, and do not require any support; they are literally loaded down with pods, which are well filled. Qt., 30 cts.; 4 qts., \$1.00; peck, \$1.60; bu., \$6.40.

Gradus, or Prosperity Pea. This fine, extra early, combines the finest quality with extreme earliness, and is also very productive. The smooth varieties of Extra Early Peas have filled their place in a way, as they could be planted very early, but there has been the need of an "extra early" which would also have that sweetness and fine flavor of the wrinkled varieties. "Gradus" fills this want. Vines 3 feet in height. Qt., 35 cts.; 4 qts., \$1.25; peck, \$2.00; bu., \$8.00.

The plants grow about 14 inches high, very stout and exceedingly productive. It makes the largest pods of any of the low-growing wrinkled Peas, and matures nearly as early as Nott's Excelsior. Qt., 30 cts.; 4 qts., \$1.00; peck, \$1.75; bu., \$7.00.

Little Marvel. For the early crop, this variety is better than American Wonder or Nott's Excelsior, as it matures earlier and the pods contain more peas. Planet Jr. Farm and Garden Tools

Planet Jr. Hand Cultivators have become the Market Gardener's and Nurseyman's friend, being no task in using them, they are in constant operation thereby not only keeping the weeds down, but also keeping the soil mellow and broken. Plants must thrive under these conditions. The above shows these tools in use at our Nurseries, Riverton, Riverview and Locust Farm.

Planet Jr. No. 3 Hill and Drill Seeder

Price, \$10.00

This drill will sow in a continuous row in the ordinary way with the greatest regularity, but its distinctive feature is that it will drop neatly in hills either 4, 6, 8, 12 or 24 inches apart. It is changed in a moment from hill to drill work; the plow is adjustable for depth and opens a very narrow furrow. Capacity two and one-half quarts.

Planet Jr. No. 3 Seeder at work in the Market Garden

Planet Jr. No. 12 Double Wheel Hoe, Cultivator and Plow

Price, \$6.50

STEEL FRAME
14-inch Steel Wheels

Two acres a day can easily be worked with this implement, and better than three men could have done in the same time with hand hoes, runs either astride or between the rows.

The No. 12 has a pair of 6-inch hoes, a pair of plows for opening or covering, and a set of 4, all steel cultivator teeth. The tools shown are what gardeners use most, and others can be added as wanted.

No. 13. Same tool as No. 12, but with only one pair 6-in. hoes, \$4.50.

"Fire-Fly" Hand Plow

For use in small gardens. Moldboard of tempered and polished steel. The depth is easily and quickly changed. Very useful to plow up chicken yards, \$2.25.

No. 25 Planet Jr. Combined Hill and Drill Seeder and Double Wheel Hoe, Cultivator and Plow.

Price, \$13.00

This combined machine is intended for gardeners who have a large enough acreage in crops for a Double Wheel Hoe to be used to good advantage, and yet prefer not to buy seeders and wheel hoes separately.

As a seeder it is practically the same as Planet Jr. No. 4. Will sow in drills any thickness or drop in hills 4, 6, 8, 12 or 24 inches apart, and has the same feed, hill dropping mechanism, and **automatic device** for stopping the feed, and has also the new seed index. It is thoroughly substantial and is accurate in planting all kinds of garden seeds in either hills or drills.

Planet Jr. Double Wheel Hoes are the greatest cultivating tools in the world for the onion and sugar-beet grower, and for every grower of garden and market garden crops from drilled seed. A tool that will save your time, lighten your labor and increase the yield of your crops by thorough cultivation.

The new Planet Jr. Catalogue, with 182 illustrations, showing a complete line of tools, mailed free on application

No. 17 Planet Jr. Single Wheel Hoe, Cultivator and Plow

Price, with Attachments as in cut, \$4.75

15-inch Steel Wheel
STEEL FRAME

No. 17. Wheel Hoe is suited to all kinds of garden cultivation and all garden crops. You can do more and better hoeing with it in one day than you can do in three days with a hand hoe. The No. 17 has a pair of 6-inch hoes, a plow and a set of cultivator teeth, an outfit sufficient for most garden work.

Other attachments can be added at any time.

Planet Jr. Twelve-Tooth Harrow, Cultivator and Pulverizer

Price, \$8.50
Less Pulverizer, \$6.90
Less Wheel and Pulverizer, \$5.70

The farmer or gardener is most likely to cultivate best who has the tool best adapted to his purpose. With the Twelve-Tooth Harrow here shown you go as deep or shallow as you like, come up close to row without injuring plants, cut out all the weeds, stir the soil, and mellow and fine it as with a garden rake. You widen and narrow as you please between 12 and 32 inches. It's a special favorite with strawberry growers, market gardeners and truckers.

Planet Jr. No. 8 Horse Hoe in the Onion Field

CELERY HILLERS are now considered indispensable. The leaf lifters are adjustable in height and are especially valuable for first workings. With their aid some of our best and largest growers hill their celery **without any "handing."** The double hiller only is fitted with lever wheel. The hilling blades are 43 inches long, adjustable in width or height as wanted; the double machine works all rows up to four feet apart. The single works all widths, and where market gardeners plant close and first bleach every other row, it is "just the thing." Before hilling, the soil should be thoroughly loosened with a horse hoe.

No. 101 Planet Jr. Plain Cultivator

Price, with Wheel, \$5.25
Price, less Wheel, \$4.50

A new Cultivator for 1916, light but exceedingly strong

The lever, instead of standing perpendicular, slants backward between the handles, free from danger of being bent or broken, and prevents injury to crops under cultivation. This tool has so few parts that there is no danger of its ever getting out of order.
